

Attunity Wins \$1 Million of Additional Business with Fortune 100 Healthcare Company to Enable Strategic Hadoop Data Lake Initiative

December 11, 2017

Customer's second large order for Attunity Replicate provides ability to scale data ingestion from hundreds of disparate data sources for analytics

BURLINGTON, Massachusetts, December 11, 2017 /PRNewswire/ --

Attunity Ltd. (NASDAQ CM: ATUU), a leading provider of data integration and Big Data management software solutions, announced today that one of its existing customers, a Fortune 100 healthcare company (the "Customer"), has re-invested in [Attunity Replicate](#) to facilitate and scale its data ingestion initiative from hundreds of sources, including mainframe, to its Hadoop data lake. This \$1 million expansion of use will enable the Customer to accelerate its strategic analytics initiative and reduce impact on operational business systems.

The Customer, who serves the health benefits and services markets worldwide, had previously used multiple data integration products to support data ingestion into their data lake. They realized that the tools increasingly required too much manual effort to support, and they had to install agents on the mission-critical source application system, which caused overhead and hindered its performance. The Customer decided to standardize on Attunity Replicate as a common platform to accommodate its larger-scale initiative, increase efficiency, improve performance, and reduce the resources required to support large scale deployment.

"The market continues to evolve and grow quickly with low penetration. This large, follow-up order from this Fortune 100 customer is a great example of the importance and value that Attunity solutions have for organizations building data lakes and scaling to accommodate growing analytic needs," explained **Shimon Alon, Chairman and Chief Executive Officer at Attunity**. "We are excited to continue working with customers that have projects of this caliber, where we start with the initial phase and work along with them as they continue to invest in scaling their architecture to meet ever-larger analytic objectives. It's rewarding to be a value-added partner who can help customers improve business insights and contribute more to their bottom line."

About Attunity

Attunity is a leading provider of data integration and Big Data management software solutions that enable availability, delivery, and management of data across heterogeneous enterprise platforms, organizations, and the [cloud](#). Our software solutions include [data replication and distribution](#), [test data management](#), [change data capture \(CDC\)](#), [data connectivity](#), [enterprise file replication \(EFR\)](#), [managed file transfer \(MFT\)](#), [data warehouse automation](#), [data usage analytics](#), and [cloud data delivery](#).

Safe Harbor Statement

This press release contains forward-looking statements, including statements regarding the anticipated features and benefits of Replicate Solutions, within the meaning of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995 and other Federal Securities laws. Statements preceded by, followed by, or that otherwise include the words "believes", "expects", "anticipates", "intends", "estimates", "plans", and similar expressions or future or conditional verbs such as "will", "should", "would", "may" and "could" are generally forward-looking in nature and not historical facts. Because such statements deal with future events, they are subject to various risks and uncertainties and actual results, expressed or implied by such forward-looking statements, could differ materially from Attunity's current expectations. Factors that could cause or contribute to such differences include, but are not limited to, risks and uncertainties relating to: our history of operating losses and ability to achieve profitability; our reliance on strategic relationships with our distributors, OEM, VAR and "go-to-market" and other business partners, and on our other significant customers; our ability to manage our growth effectively; acquisitions, including costs and difficulties related to integration of acquired businesses and possible impairment charges; our ability to continue to expand our business into the SAP market and the success of our Gold Client offering; timely availability and customer acceptance of Attunity's new and existing products, including Attunity Replicate, Attunity Compose and Attunity Visibility; fluctuations in our quarterly operating results, which may not necessarily be indicative of future periods; changes in the competitive landscape, including new competitors or the impact of competitive pricing and products; a shift in demand for products such as Attunity's products; the impact on revenues of economic and political uncertainties and weaknesses in various regions of the world, including the commencement or escalation of hostilities or acts of terrorism as well as cyber-attacks; and other factors and risks on which Attunity may have little or no control. This list is intended to identify only certain of the principal factors that could cause actual results to differ. For a more detailed description of the risks and uncertainties affecting Attunity, reference is made to Attunity's latest Annual Report on Form 20-F (as amended) which is on file with the Securities and Exchange Commission (SEC) and the other risk factors discussed from time to time by Attunity in reports filed with, or furnished to, the SEC. Except as otherwise required by law, Attunity undertakes no obligation to publicly release any revisions to these forward-looking statements to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.
